

# Paediatric Advanced Life Support

CPD  
12 HOURS

## CERTIFICATE OF COMPETENCE

**This certifies that**  
Mr. Stuart McKiernan

November 20 2022

### Has achieved competence in Paediatric Advanced Life Support by:

- Achieving 80% or above in theoretical exam
- Demonstrating effective CPR for 2 minutes
- Participating in all PALS team roles (including team leader, defibrillation, circulation, airway)
- Correctly managing shockable and non-shockable pathways
- Safe use of a manual defibrillator including charging through compressions, rhythm interpretation, defibrillation and disarming
- Preparation and administration of correct resuscitation medications
- Demonstrating effective airway management including the use of waveform capnography, insertion of oropharyngeal airway, assistance / insertion of advanced airways (SGA, ETT)
- Assessment and management of reversible causes using an ABCDE approach
- Initiation of post resuscitation cares using an ABCDE approach
- Demonstration of non-technical skills including closed loop communication, prioritisation, situational awareness, effective communication and documentation

The protocols used for this assessment are in accordance with the current Australian Resuscitation Council Guidelines (ANZCOR)

### Annual recertification is recommended
