

Statement of Attendance

Mr. Stuart McKiernan

Paediatric Assessment of Clinical Emergencies and Deterioration

This CPD activity covered the essential concepts in paediatric nursing with a focus on the assessment of paediatric emergencies and clinical deterioration. Including:

- Differences in the anatomy and physiology of paediatric patients compared to adult patients
- How physiology leads into pathways of deterioration of childhood illness
- Physiological parameters
- Practical tips and tricks for assessment to ensure accurate observations in children
- Common causes of presentation of children to hospitals
- Case studies from presentation to deterioration and interventions
- Key clinical skills videos including Intraosseous access, ETT taping, Distraction, Physical Assessment

1/06/2022 11:00:00 AM - 8/06/2022 1:00:00 PM

6 CPD hours
